

Crimp Tools

PNEUMATIC CRIMPING MACHINE KTM-4000

The Kings KTM-4000 pneumatic crimping machine provides an effective and safe means for crimping RF cable connectors. It uses standard Kings KTH-2000 series dies, which fit directly into the machine. (No additional adapters or jaws are required.) The crimping machine comes completely assembled and ready for use. All that is required is the attachment of hose fitting, assembly of specific dies, and connection of the hose fitting to air source.

KTM-4000

FEATURES

- Automatic power crimping at low cost.
- High crimping forces achieved thru an air cylinder toggle mechanism. (in excess of 30,000 pounds)
- Force elements are completely enclosed.
- Ideal for long or short production runs.
- Dies for holepunching, notching, forming. Stamp can be adapted.
- Foot control to free operators hands for crimping operation
- Fast and easy changing from one crimping die to another.
- Machine returns to open position automatically.
- Contact and connector stops for uniform crimping.
- Portable, bench mounted, no permanent lines attached.
- Low maintenance.
- Designed with OSHA safety requirements in mind.
