TT® (BANTAM) CIRCUIT GUARD PLUGS

APPLICATION

Circuit guard plugs snap into TT-Jax® (bantam) jacks eliminating accidental or unauthorized insertion of a plug into a critical circuit. The circuit guards plugs do not actuate the jack springs. These plugs seal the jack bushing and provide an additional means of circuit identification.

Circuit guard plugs are available in three different designs: Series TT512, Series TT513 and Series TT514. All three designs are molded thermoplastic and are available in the following colors: red, black, green, blue, white or yellow.

SERIES TT512

TT512 circuit guard plugs cover an individual jack opening and insert to a virtually flush position with the front panel.

SERIES TT513

TT513 circuit guard plugs are similar to the Series TT512 except the button extends .219" from the front of the panel for easier removal.

SERIES TT514

TT514 circuit guard plugs cover both the IN and OUT jacks of two adjoining circuits while leaving the monitor jacks exposed for circuit testing. The four jack circuit guard plugs also include a matte finish white plastic marking strip and a clear extruded plastic window for additional designation.
