- Available in 10 popular colors.

KTM-5000

PNEUMATIC CRIMPING MACHINE

- Portable, bench-mounted with no permanent lines attached.
- Designed for use with KINGS® KTH-1000 and KTH-2000 die sets.
- Ideal for long or short production runs.
- Convenient foot control frees operator hands for crimping.
- Quick and easy changing from one die to another.
- Pneumatic interlock feature guarantees constant crimping.
- Designed with OSHA safety requirements in mind.
- Low maintenance.

KTH-1000

HAND CRIMPING TOOL

- Field-tested and approved - an industry favorite.
- Ratchet-type tool does not release until crimp is complete.
- Robust and reliable - frame made of heavy-duty, lightweight aluminum.
- Interchangeable dies available to fit a variety of connector and cable types.

KTS-8-1 AND KTS-8-2

MANUAL STRIPPING TOOLS

- Hand-held tool is lightweight and compact - ideal for field use.
- Blade cassettes and memory blocks interchange quickly and easily.
- Cam adjustment ensures precise hold on cable without distorting the jacket.
- KTS-8-1 is designed specifically for the Belden 179 DT Cable.
- KTS-8-2 is adjustable for use in most two- and three-piece BNC applications.

KTH-5000

HAND CRIMPING TOOL

- Economical and user-friendly alternative to other industrial crimping tools.
- Lightweight, ergonomic tool allows for one-handed operation.
- Ultra-smooth ratchet design with rubber grip handles.
- Available dies developed specifically for precise crimping of KINGS® connectors.
